---

Thanks Earl; appreciate all the work you are doing on this.

You may have seen this already, but the Harris County Flood Warning System is calling Harvey a 500-year flood for the San Jacinto; the USGS put in a temporary gauge at the I-10 bridge & the crest was a little over 14-ft, or about 5-feet over the cap high point at the central berm. The river is going back down now - the stage was 8-ft this morning & falling.

Earl,

Can I get an update on the model/report?

Thanks,

Gary, The model is running much slower this last time than before. I am not sure why, but the results are the same as before. Because more output is being written, it must have hit some threshold where the model run time is much

longer. That is my guess. I will check again tomorrow evening and send you an estimate on when everything will be completed.

Subject: San Jacinto

Earl,

Can you let me know the status of the model report?

Thanks,

Gary Miller
